

**Become part of our team -  
as a working student / intern  
in the area of Cloud  
Engineering and Data Science**

- You are studying engineering, computer science, business informatics or electrical engineering?
- You are interested in current digital technologies?
- You have a solution-oriented approach and commitment?
- You have a high willingness to learn and work independently?

Then you are exactly right with us!

Your tasks in our team include:

- Collaboration in one or more development areas
- Maintenance of the existing system
- Smaller tasks in the administrative area

scitis.io stands for generating knowledge from machine data. With our Industrial IoT platform, machine builders and operators can collect and analyze data and perform AI projects, for example. We are convinced that digitalization is the greatest opportunity of the future. This is also reflected in the way we work: Whether at home or in our office in Stuttgart, we can collaborate from anywhere. Team spirit is particularly important to us and everyone can contribute with their ideas!

We are a young team of currently 12 employees. If you feel addressed and would like to become part of scitis.io then send your application to: [people@scitis.io](mailto:people@scitis.io)
