Head of IoT (m/f/d) full/part time - nationwide

Machine Learning, Internet of Things or Industry 4.0 are your topics? Then you are exactly at the right place with us!

We - scitis.io

We are a great team with over 15 employees and are looking for you to join us. As scitis.io we offer our customers, who are spread all over the world, solutions to connect machines and train AI on the machine data. As a technology partner of Google, we support customers and customer systems worldwide from our location in Stuttgart. Our customers value us, use our technology and our skills so that they can position their products even better on the market.

In this market we are growing continuously and are looking for you to join our team.

Your future tasks

- You lead internal and external meetings
- You have an overview of ongoing projects, open tasks, coordinate the work of employees and set priorities for yourself and others
- You have heard of project controlling before
- You can explain to the customer why things are going slower than planned
- You are a problem solver should something not go as planned with a customer, which rarely happens You take responsibility for the success of customer projects

Your profile

- Commitment, initiative, curiosity, logical thinking
- Several years of practical experience in project management in a technical environment
- Initial management experience - also as a previous deputy project manager
- Confident appearance and social skills
- Reliability and willingness to take responsibility with a tendency to make open statements
- Teamwork and communication skills - also in critical situations

- Good knowledge of German and English - we work 80% in English
- Open to new simple user software
- Willingness to perform, enthusiasm with an affinity for digital tools
- Willingness to travel is good - will only be necessary in very special cases

We offer

- Responsible task in a market with permanent and sustainable growth
- Customer spectrum from medium-sized to DAX companies
- Performance-oriented remuneration
- Short and direct decision-making channels and flat hierarchies
- Flexible working hours oriented to the project as well as mobile working
- Familiar and collegial working atmosphere
- Promotion of further training
- Regular exchange of experiences with colleagues and superiors
- Up-to-date technical equipment with company notebook and smartphone
- 28 days of vacation + special leave
- On-site in the middle of Stuttgart-West with direct S-Bahn connection: drinks, snacks & ice cream - flat rate.

If we have aroused your interest or if you have any questions, please contact
